

Stretched Fabric with Fascia

Stretched Fabric (SMT) exhibitors who have ordered and paid for the booth package, will be provided with a **stretched fabric wall (SMT)** system, consisting of taught white fabric walls, including a front crossbar, and a double-sided street sign with company name and booth number. Stretched Fabric booth walls can be upgraded to a graphic panel.

Booth configurations vary for this type of booth package. Show Management provides a specific schematic for the contracted booth size. A standard 10' x 10' booth has an inside width dimension of 9' 7". A 10' x 10' constructed display will not fit within the confines of a 10' x 10' SMT with fascia booth package.

If you are taking the packaged booth option, please be advised that stretched fabric framework will be in place overhead, around the sides, and in front of your booth(s) as a means of support. Where an exhibitor takes more than one space, support wall panels are provided as long as the request and an accompanying floor plan highlighting the position of the wall panels are received by the Operations Department on or before **January 3, 2025**.
